NITRAFLEX™

**THE 1ST CLINICALLY-DRIVEN
PRO-TESTOSTERONE PRE-TRAINER**

CRUSHING 3X STRENGTH

NEW!

BREAKTHROUGH
SCIENCE

WARNING:
NITRAFLEX IS NOW THE
#1 BRUTALLY AGGRESSIVE
VASOACTIVE PRE-TRAINER

SEETHING INTENSITY!

THIS NEW BREED OF CONCENTRATE *is an annihilating force to reckon with.* So illicitly strong, it may become extinct. Regenerating new muscle at an anabolically-expedited rate with intensity beyond belief is what NITRAFLEX is all about. To make you the predatory beast whether on stage, at the gym, or when strength needs to be summoned up full-tilt.

How does "seething intensity" look and feel? Start taking NITRAFLEX today to find out. The size you get from tearing down flesh from within will be living proof.

To find out more, come visit us online at TeamGAT.com, or call us now at 1 888 763-4597.

NEW! BREAKTHROUGH SCIENCE!

1ST HYPEREMIA & ANABOLIC ENHANCING PWD

1-SCOOP CRUSHING 3X STRENGTH*

NEW!

SUPER-INTENSIFIED ENERGY*
CLINICALLY PROVEN PRO-TESTOSTERONE*
REACTIVE HYPEREMIA (MUSCLE PUMPS)*
DMAE INFUSED, MIND-IN-THE-MUSCLE FOCUS*
ROAD MAP VASODILATION*

PHYSIOLOGICAL BASIS: "Reactive hyperemia" describes the increase in muscle blood flow that occurs during high-intensity resistance exercise and produces the "pump" associated with increases in muscle size. The NITRAFLEX Proprietary ("proprietary" + "nutraceutical") Formula contains ingredients suggested by in vitro, animal and clinical studies to possess properties that may help advanced athletes maximize muscle contraction strength, intensify and prolong reactive hyperemia (pumps), and promote muscle size and strength gains.

PROPRIECEUTICAL PROPERTIES

• **1-SCOOP POTENCY:** So potent, only 1 scoop (1 serving) is required. Do NOT exceed 1 scoop in a single 24-hour period.

• **HIGH CIT:ARG RATIO:** Citrulline (Cit) and arginine (Arg) are precursors to nitric oxide (NO), a potent vasodilator. However, Arg stimulates the activity of arginase, an enzyme that destroys Arg. This can lead to lower Arg and NO levels. Research suggests that supplementing with a higher ratio of Cit to Arg may support higher levels of NO by avoiding overstimulation of arginase¹. Cit is the body's "preferred" precursor for Arg for the purpose of synthesizing NO. Studies show that Cit increases Arg levels and markers of NO production².

• **UNIQUE RATIOS OF CLINICALLY STUDIED COGNITIVE ENHANCERS** including 1,3,7-trimethyl-1H-purine-2,6(3H,7H)-dione, 2-(Dimethylamino)ethanol and 2-Amino-4-(ethylcarbamoyl) butyric acid to support immediate energy, alertness and focus during high-intensity exercise.*

• **TESTOSTERONE-ELEVATING COMPLEX:** Calcium fructopyranose borate (CFB) is a completely non-steroidal, nature-identical compound shown in two clinical studies to increase testosterone in healthy subjects*. The average increase in total and free ("active") testosterone in a 6-week study was 56% and 29.5%, respectively³. In a second study, total and free testosterone increased by average of 10.2% and 5.25%, respectively, in only 3 hours after a single dose of CFB. Considering that only roughly 2% of testosterone is normally free, these are significant increases. CFB is not a banned substance.

• **CREATINE-FREE:** To prevent undesirable water retention, GAT scientists did not add creatine to the formula.

300 GRAM BOTTLES - 30 INTENSE SERVINGS - GREEN APPLE FLAVOR

SUPPLEMENT FACTS

Serving Size: 1 Scoop (10 grams) Servings Per Container: 30

Amount Per Serving % DV

NITRAFLEX™ PROPRIECEUTICAL BLEND 7365 mg **

Vasoactive Arginase-Regulating NO Precursor Complex
2-Amino-5-(carbamoylamino)pentanoic acid, (S)-2-Amino-5-guanidinopentanoic acid, L-Arginine Alpha-ketoglutarate, (E)-5-(4-hydroxystyryl)benzene-1,3-diol, 4-[(E)-2-(3,5-dimethoxyphenyl)ethenyl]phenol
Acute Energy, Focus, Intensity, Neuromodulating, Endurance Complex
3-Aminopropanoic acid, 1,3,7-Trimethyl-1H-purine-2,6(3H,7H)-dione, 2-(Dimethylamino) ethanol, 2-acetylamino-3-(4-hydroxyphenyl)-propanoic acid, 2-Amino-4-(ethylcarbamoyl) butyric acid, Micro-encapsulated Beta-Phenylethylamine (for optimized absorption into the bloodstream), Rauwolfia (Rauwolfia Canescens L. [Leaf And Root])
Clinically-Studied Testosterone-Enhancing Complex
Calcium fructopyranose borate (CFB) US Patent #5,962,049

** Daily Value not established [Each scoop contains 325 mg of Caffeine]

Other Ingredients: Citric Acid, Malic Acid, Acesulfame-K, Sucralose, Natural and Artificial Flavors, Silica, Blue#1, Yellow#5
